

Stock Throughput Insurance

Stock Throughput is comprehensive, seamless coverage for an insured stock through their entire supply chain. Coverage commences the moment they assume responsibility until their interest ceases, eliminating potential gaps between multiple policies.

KEY FEATURES

- Full 'All Risks' conditions for global storage and transit exposures
- Continuous coverage is provided for raw materials, work-in-progress and finished products on a domestic and global basis
- Can provide any combination of the following coverages all under one policy:
 - Storage
 - Ocean Cargo
 - Inland transit
- Coverage can include Windstorm, Flood and Earthquake with deductibles (No percentage deductibles for catastrophic exposures)
- Selling price basis of valuation provides an element of business interruption coverage
- Ease of administration through premium rating against sales turnover, eliminating the need for time consuming declarations
- \$250,000,000 of available capacity with top rated insurance carriers
- Policy application on a Primary and Excess basis
- Manuscript wording tailored for each risk
